SIZE GUIDE

Print this page making sure to keep its original measurements: **in the print settings the scaling must be scaled: 100% (deletes, if present, the "Fit and Center" check).**

Place your ring on the circles of the page: Find the circle that is visible inside the ring. Preferably use a simple record. For a precise measurement there must be no margin between the ring and the rim. To check that the document has been printed in real measurements, verify that the example below measures exactly 3 cm. You can use a common ruler.

Do not place the ring directly on the monitor: the match would not be correct
